DETAILED ACTION

This application is a §371 application of PCT/US2005/009198 that was filed on March 18, 2005, which claims priority from U.S. Provisional Application No. 60/555,164, filed on March

22, 2004.

Claims 1-9 are pending.

Election/Restriction

Applicant's election without traverse of the species: N-2-(3-chloro-4-fluorophenyl)-N-1-[2-(dimethylamino)ethyl]-N-2-(3-hydroxybenzyl)alaninamide in the reply received on October 31, 2008 is acknowledged. The election is deemed proper and is therefore made FINAL.

No art was identified on the elected specie: N-2-(3-chloro-4-fluorophenyl)-N-1-[2-(dimethylamino)ethyl]-N-2-(3-hydroxybenzyl)alaninamide. After searching the structures of Claims 6 and 7 using STN and applying the searches disclosed in the search notes, Examiner found no anticipating or obvious variants of the compounds recited in Claims 6 and 7.

Objections

1. Claims 3-5, 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112, second paragraph/101

2. 35 U.S.C. 101 reads as follows:

Application/Control Number: 10/593,504 Page 3

Art Unit: 4121

3. Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

- 4. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 5. Claim 9 provides for the use of the compound according to Claim 1 for the preparation of a medicament useful in the treatment or prevention of cancer in a mammal in need of such treatment, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
- 6. Claim 9 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd.* v. *Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Application/Control Number: 10/593,504 Page 4

Art Unit: 4121

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 7. Claims 1,2, and 8 are rejected under 35 U.S.C. § 102(b) as being anticipated by Fox *et al.* (J. Org. Chem., Vol. 38, No. 6, 1973, p. 1136-1140, "the Fox article", provided by Applicant in the IDS received 2/12/2007).
- 8. Regarding Claims 1, 2, and 8, the Fox article teaches a compound of Formula I.

 Specifically, Table V of the Fox article teaches a compound (registry no. 37931-54-7) where X = H, and Y = F.
- 9. Regarding Claim 8, the experimental procedure of the Fox article teaches the synthesis of the compounds in Table 5. In addition, those compounds are dispersed in a pharmaceutical carrier--an ethereal solvent. The compounds are synthesized starting at a 2.4 mmol scale and yields of 30-73% (experimental section) are obtained, giving an ethereal solution containing more than an effective amount. For example, the specification of the instant application discloses: "a suitable amount of compound is administered to a mammal undergoing treatment for cancer. Administration occurs in an amount between about 0.1 mg/kg of body weight to about 60 mg/kg of body weight per day[.]" (instant application, US2008/0234281, paragraph 143).

Conclusion

10. Claims 1, 2, 8, and 9 are rejected. Claims 3-5 and 7 are objected and Claims 6 is deemed allowable.

Application/Control Number: 10/593,504

Art Unit: 4121

11. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to CLINTON BROOKS whose telephone number is (571)270-7682.

Page 5

The examiner can normally be reached on Monday-Friday 8:00 AM to 5:00 PM EST.

12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, PATRICK NOLAN can be reached on (571)272-0847. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

13. Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
